The Sustainable Lush Interest Free Loan for Honey Production

The Sustainable Lush Fund, of Lush Cosmetics, has announced the launch of a new interest-free loan for regenerative honey production!

The Sustainable Lush Capital Loan is a tool used to grow a web of resilient honey producers. The loan is based on principles of easing the financial risk of transitioning production methods, experimentation in business plans, and expansion into new markets. Loan repayments can be made with a percentage of raw materials that result from the Loan.

Please send applications to SustainableLushFund@lush.com [1]. For more information about Lush, visit www.lush.ca [2].
