## Services Directory

The Services Directory is a “yellow pages” of regional farm-related service providers. Browse the categories below or hover over the drop-down menu to the left to see the categories of services you can search for.

This resource is a work in progress. Let us know what we have forgotten, and tell us if you find an error. This is a community project!

If you are looking to buy, sell or trade farm-related items (eg. used machinery or equipment), make sure to check out our [Trading Post](#) [1].
